DETAILED ACTION

Response to Amendment

1. The amendments filed on 8/13/07 under 37 CFR 1.131 is sufficient to overcome the references of record. Additionally, the terminal disclaimer filed 8/30/07 with regards to application 10/021238 has been accepted and the double patenting rejection pertaining to that copending application is also withdrawn. Finally the double patenting rejection with regards to 10/250955 is withdrawn as the application is abandoned.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The present application is allowable over the prior art because the present application discloses an anatomical selectivity within ultrasound lysis of adipose tissues. This anatomical selectivity allows both the adipose tissues and other various tissues surrounding and intermixed with adipose tissues to receive the ultrasound beams while only lysing the adipose tissues itself. The closest references disclose lysis of adipose tissues and selection of areas of interest and therapy that are small enough to prevent lysis of non-adipose tissues, but both the adipose tissue and non-adipose tissues do not receive the therapy, only the adipose tissue does, and the prevention of lysis is generated from the focus of the beam, rather than the properties of the beam itself.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
